Did you know...

- you can send us your files direct to our file loader. Just drag & drop to:
www.tomesindustries.com/upload (you need to have java installed)
- we can do spiral machining on our machining centers.

Industries Served

Agriculture
Automotive
Aerospace
Electronics
Food
Medical
Military
Pharmaceutical
Railroad
Recreational Vehicles

Volume 1, Issue 2

October 12, 2010

Tomes Industries, Inc., is a firm specializing in manufacturing precision machined products, using all types of metalworking equipment. We work with manufacturing companies, building tools and finished products, as well as complete machines to their needs, which all can require close tolerances (perfect parts). A wide array of materials are used, from plastic to tool steels, which allows us to meet each of our customers specific wants and needs. Our design team can help turn your problem into a cost effective solution.

Precision News

We would like to introduce our newest member to the team. Brett Menze joined us in late July and will be working in our design and programming areas. Brett grew up in the Utica area, and has moved back with his family. Brett's immediate family includes his wife Candi, and two daughters Rylee, 4, and Emery, 5 months. Brett enjoys golfing, spending time with his family and working on his new house.

Maximize Production

Don't forget to check out our line of ergonomic handling & linear transfer equipment.

Pictured is the EZ-Lift System. Click the link below to view informational video:

Unique Project

This is one of the smaller machines we have built. We manufactured all machined components, assembled, wired, and programmed this machine for our customer. They use this machine for the use of processing hair samples. Our customer provides services for the agricultural biotechnology industry and is a leading global provider of DNA testing for farm animal improvement and genomic based veterinary diagnostics. They were also instrumental in tracking down the Mad Cow Disease.

**"Price is what you pay.
Value is what you get."
~Warren Buffet**

Mini Conveyors

Have a conveyor application? Our aluminum frame conveyors are constructed of extruded aluminum frame, are very strong but lightweight. The smooth, continuous surface of a conveyor belt is ideal for many product handling applications. Custom engineered solutions are available to achieve optimum conveyor configurations.

Organizational Tip

Do you have chains laying on the ground?

Cut down a 5 gallon bucket and spray paint the ends of the chain to match the color of the bucket. Label the bucket with the length and size of chain.

Works great for storing and carrying your chains.

Inventory

We carry many types of:

- Steel
- Plastics
- Fasteners
- Tooling
- Electrical
- Hydraulic
- Pneumatic
- Safety Mesh
- Aluminum Extrusions

Geared for all your precision manufacturing and design needs!

Featured Machine - Wire EDM

Do you need parts like these?

Our 4 Axis totally submerged wire EDM's are some of the finest machines available. With a maximum machining range of 19.69"x13.77"x11.81". They are also equipped with an Auto Wire threader, 44 lb. wire spool & 3R 1 Minute Setup tooling. This allows us to set up in just a matter of minutes and run unattended for those extremely long jobs. They provide quality high tolerances on tooling or production style parts. Send in a RFQ for a Wire EDM machined part and receive a free t-shirt.

Just some of the many precision parts that were manufactured from our EDM Department.

'Tis the Season for Tailgating

It's tailgating season and gridiron gourmets are fired up and ready to grill in stadium parking lots across the nation! As soon as Labor Day rolls around, football season arrives to take our minds off the bittersweet ebb of summer. So we thought it would be good, once again, to enjoy lunch by serving up some traditional tailgate foods. It was a fun way to end the work week and welcome the long holiday weekend.

Tailgate parties started out with just a few drinks, snacks, and a couple sandwiches before a game. Now tailgating has become one of Americas

greatest sports traditions. Here's some tailgating trivia:

- 30% of tailgaters never see the inside of the stadium.
- The number of sports fans who regularly tailgate has risen 12 percent annually during the past five years.
- The first inter-collegiate tailgate party was in November 1869, when Rutgers played Princeton.
- 51% start setting-up at the stadium 3-4 hours before the game, while 39% start 5 or more hours before kickoff.

Ron Tomes serving up some brats to Dan Kucera.
